

'The King's Demons' features Tegan in a short skirt walking around a draughty medieval castle and complaining about the cold. This is a good cue for a passing threat, as the Doctor tells her, 'If you don't stop whingeing, Tegan, I'll make sure that part of you gets very warm indeed.' But if that keeps the interest alive, it's not actually till the end of the story that a sterling spanking opportunity presents itself, when the Doctor decides to take Kamelion aboard the TARDIS as a third traveling companion. Tegan objects to this, for reasons that are not readily apparent on screen and needn't be any clearer in the Spanking Adventures version. The point is that Tegan is being unfairly disagreeable, and she isn't going to get away with it...

'I think we know what to do about this,' says the Doctor. The Kamelion robot shimmers, and its silver sheen resolves to beige. Tegan looks from side to side to see two identical versions of the Doctor advancing on her – and she knows that look in his eyes! 'After you, Doctor,' says one of them. 'No, I insist,' replies the other, 'After *you*.' Then one of the Doctors sits down and takes Tegan across his knee.

This is awful for Tegan on several levels beyond the fundamental and disagreeable fact that she is about to get a spanking. She still hasn't got over the dislike and distrust she feels for Turlough. Now she is going to be spanked in front of him. And she doesn't know whether the spanking is going to be witnessed or, worse, actually administered by the shape-changing robot she also finds objectionable. 'Doctor,' she says, protestingly.

'Yes?' replies the standing Doctor. Tegan's heart sinks with the realization that she is over the robot's lap.

'You're doing this deliberately,' she protests. 'Controlling that thing telepathically! Now make it let me up, or I'll...'

'Strange as it may seem,' cuts in Kamelion, 'I do have a mind of my own.'

And since Kamelion can be controlled telepathically, Kamelion's mind has some strange powers of communication. He *knows* exactly how to make the situation worse for Tegan. And likewise Turlough just knows exactly what he needs to do. Tegan feels a tingling beneath her stomach as Kamelion begins to blur and shift his shape. Turlough crosses the console room and wheels over a full length mirror. Tegan looks up to see the reflection of herself apparently across Turlough's knee, about to be spanked.

But there is one last preparation. The Kamelion Turlough's fingers take hold of the hem of her skirt and lift it, exposing the tight, round seat of her white panties. Tegan squeals in humiliated mortification, then squeals again as Kamelion's open hand makes sharp contact with her bottom. And let's not forget that Kamelion is made of metal: it's a lot

more painful than the mere handspanking it appears to be!

Tegan would feel the tingle beneath her again if she were less focussed on the pain in her bottom. The sound of slaps and squeals mingle with a roar of laughter from the Doctor and Turlough. Tegan looks up at the reflection in the mirror. Kamelion has taken on a new form. Now it appears that she is being spanked by ... herself!
